- Extra strong and durable cutlery can confidently be paired with many meal types, including: steak, pasta, seafood
- Designed with a contemporary look and provides a comfortable, natural grip
- Certified industrial compostable

Compostable

Convenience

Premium Look

## DELIVER FULLY COMPOSTABLE SOLUTIONS

Sabert's compostable cutlery is made from crystallized PLA, a durable and renewable plant-based bioplastic. The crystallization process increases heat tolerance, and is designed to improve strength, to ensure these utensils will not break or bend during use. The natural white cutlery offers the convenience of ordinary disposable cutlery, with the added benefit of being certified industrial compostable. Sabert's compostable cutlery is the ideal pairing with pulp packaging solutions for takeout and delivery to create a fully compostable and sustainable offering.
