

Sabert's Molded Pulp Formulations

Sabert's Center for Innovation developed propriety pulp formulations – **Standard Pulp**, **Pulp Plus™**, **Pulp Max™** and **Pulp Ultra™**, – designed to provide a perfect fit for use application for your customers needs.

Standard Pulp

Low-grade resistance to oil and grease

Works well for immediate consumption

Microwavable and oven safe up to 400°

Limited moisture resistance

Not recommended for refrigerator or frozen environments

Pulp Plus™

Low-grade resistance to oil and grease

Works well for immediate consumption

Microwavable and oven safe up to 400°

Enhanced moisture resistance

Mid-range shelf-life in refrigerated applications

Pulp Max™

Excellent resistance to oil and grease in moderate duration

High oil resistance for 30 minutes to 2 hours

Suitable for reheating in microwave ovens

Not recommended for refrigerator or frozen environments

Pulp Ultra™

Superior resistance to oil and grease

High oil resistance for 2+ hours

Microwavable, oven safe up to 400° and TurboChef safe up to 500°

Exceptional moisture resistance

Extended shelf-life in refrigerated or frozen applications
